

Saurabh Dindokar

Senior DevOps Engineer | AWS | Kubernetes | CI/CD | Cloud Migration

Pune, Maharashtra, India | +91 8983659327 | sirdindokar@gmail.com | Portfolio: <https://saurabhdindokar.github.io/>

Professional Summary

AWS DevOps Engineer with 5+ years of hands-on experience across cloud migration, Kubernetes/EKS, ECS/Fargate, CI/CD, Docker, infrastructure automation, monitoring, backup planning, release operations, and production support. Experienced in AWS deployment workflows using EC2, ECS, EKS, ECR, S3, IAM, VPC, ALB, Route 53, CloudWatch, CloudFormation, SSM, Jenkins, CodeBuild, CodePipeline, Terraform, Ansible, Helm, ArgoCD, Linux, Nginx, systemd, and Windows IIS.

Key Achievements

- Recognized as Best Performer of the Team, Best Mentor of the Year, and Best Team Lead in November 2025.
- Supported full on-prem/self-managed to AWS EKS migration planning including Dockerfiles, Jenkins CI/CD, ECR, Kubernetes manifests, ArgoCD, ALB ingress, CloudWatch, rollback, and handover.
- Standardized health-check endpoints/files across Scala, Node.js, Java, and Angular services with Kubernetes liveness/readiness probes.
- Created reusable deployment, monitoring, backup, rollback, DR, KT, and production handover documentation.

Core Skills

AWS: EC2, ECS/Fargate, EKS, ECR, S3, IAM, VPC, EBS, EFS, ALB, Route 53, ACM, CloudWatch, CloudFormation, SSM, SNS, WAF, Secrets Manager, CloudFront, Global Accelerator

DevOps/CI-CD: Jenkins, AWS CodeBuild, AWS CodePipeline, GitHub Actions, Bitbucket Pipelines, Git, GitHub, GitLab, Maven, SonarQube, Nexus, Groovy, release automation

Containers/IaC: Docker, Dockerfile, Kubernetes, Amazon EKS, Amazon ECS, Helm, ArgoCD, Terraform, Ansible, CloudFormation, YAML, JSON

Operations: Linux, Shell scripting, Bash, PowerShell, Nginx, systemd, PM2, Windows Server, IIS, CloudWatch, Prometheus, Grafana, Nagios, ELK/Elasticsearch

Databases: RDS PostgreSQL, RDS MySQL, RDS SQL Server, DocumentDB, MongoDB, Redis/ElastiCache, Kafka, Elasticsearch

Professional Experience

Senior DevOps Engineer | Ficode Software Solutions Pvt. Ltd.

May 2024 - July 2026

- Delivered AWS DevOps implementation across cloud migration, Kubernetes, CI/CD, monitoring, backup planning, release documentation, and production support workstreams.
- Worked on on-prem/self-managed to AWS EKS migration using Docker, ECR, Kubernetes manifests, ALB ingress, AWS Load Balancer Controller, EBS CSI driver, gp3 storage class, ArgoCD, Jenkins/Nexus, and CloudWatch.
- Created Dockerfile and deployment patterns for Scala, Node.js, Java, and Angular services; documented ECR image flow, Kubernetes deployment flow, service routing, ingress behavior, and rollout validation.
- Added health-check endpoints/files and configured liveness/readiness probes to improve pod restart behavior, traffic readiness, and deployment safety.
- Supported Jenkins to AWS-native CI/CD modernization planning using CodePipeline, CodeBuild, Docker image builds, ECR push flow, S3 artifact/dependency storage, IAM role planning, and CloudWatch logs.
- Prepared ECS/Fargate migration and cloud operations documentation for an IoT healthcare platform covering ECS, ECR, ALB/NLB, S3, CloudFront, Route 53, WAF, Secrets Manager, DocumentDB, RDS PostgreSQL, Redis/ElastiCache, CloudWatch, and DR planning.
- Built deployment reference material for Windows Server/IIS workloads using Windows EC2, IIS, .NET Core, WordPress, S3 artifacts, SSM/PowerShell execution, SQL Server/MySQL, CloudWatch dashboard notes, and backup documentation.
- Prepared Terraform-based AWS deployment planning for an enterprise automation platform using EC2, private RDS MySQL, S3 document storage, IAM roles, security groups, Nginx, FastAPI, React, Docker Compose/systemd, and Bitbucket pipeline examples.

- Managed CI/CD, AWS infrastructure, deployment automation, monitoring, logging, configuration management, and Linux administration for Dev, QA, and Stage environments.
- Installed and administered Jenkins CI on Linux; managed build/deployment jobs and Jenkins master-agent architecture for release execution.
- Provisioned AWS infrastructure using Terraform and supported configuration management using Ansible for package installation, application setup, configuration files, and environment automation.
- Worked with AWS EC2, S3, EBS, EFS, ELB, IAM, Auto Scaling, EKS, and CloudWatch for cloud infrastructure and application support.
- Used Docker, Docker Registry, Docker Swarm, Kubernetes, and Helm for containerization, orchestration, microservice deployment, scaling, and log management.
- Built monitoring visibility using Prometheus, Grafana, Nagios, and ELK/Elasticsearch; supported Git/GitHub/GitLab workflows and shell script automation.

Selected Project Experience

Smart Building Management Platform

On-prem/self-managed to AWS EKS migration covering Dockerfiles, Jenkins, ECR, Kubernetes manifests, ArgoCD, ALB ingress, service routing, health probes, CloudWatch, rollback, and handover.

IoT Healthcare Platform

ECS/Fargate migration and DR readiness using ECS, ECR, ALB/NLB, S3, CloudFront, Route 53, WAF, Secrets Manager, DocumentDB, RDS PostgreSQL, Redis, and CloudWatch.

Cloud-Based Membership Platform

Linux-first AWS deployment POC with Jenkins, CloudFormation, EC2 Linux, S3 artifacts, SSM, Nginx, ASP.NET Core systemd services, RDS SQL Server/MySQL, CloudFront, and Route 53.

Enterprise Automation Platform

Low-cost AWS deployment model using EC2, private RDS MySQL, S3 document storage, IAM, security groups, Nginx, FastAPI, React, Docker Compose/systemd, and Bitbucket pipelines.

Certification and Education

AWS Certified Solutions Architect - Associate | Issued May 2025 | Expires May 2028

Master of Computer Application | GHRU Amravati University

Bachelor of Computer Application | SGBA University
